Professional Summary

Computer Science and Business Systems graduate with a strong foundation in Python, Django, HTML, CSS, JavaScript, React, and MySQL. Hands-on experience gained through internships and academic projects in full-stack web development, database management, and cloud-based application development. . Currently pursuing professional training in Full Stack Python Development at Besant Technologies. Passionate about building scalable software solutions, solving real-world problems, and continuously learning emerging technologies. Seeking an entry-level Software Developer or Full Stack Developer role to contribute technical, analytical, and problem-solving skills while growing in a dynamic IT environment.

Technical Skills

Programming Languages: Python, JavaScript

Frontend: HTML5, CSS3, Bootstrap, React

Backend: Django

Database: MySQL

Version Control: Git, GitHub

Tools: VS Code, MySQL Workbench, Microsoft Excel, Word, PowerPoint

Professional Training

Full Stack Python Development (Currently Pursuing)

Besant Technologies, Chennai

- Learning Python, Django, HTML5, CSS3, JavaScript, React, Bootstrap, and MySQL.
- Developing responsive full-stack web applications using modern development practices.

Internship Experience

Python Intern

MAKE Cloud Digital Transformation

Bengaluru

Jun 2025 – Jul 2025

- Developed Python applications integrated with MySQL databases.
- Built and tested application modules while improving debugging and database management skills.
- Collaborated with mentors to understand the software development life cycle and deployment workflow.

Technical Intern

Titan Company Limited

Hosur

Mar 2024

- Assisted in digital system operations and technical support.
- Worked with engineering teams to solve operational issues.
- Gained practical exposure to industrial workflow, teamwork, and documentation.

Projects

Student Management System — MySQL

- Designed and developed a relational database system for managing students, departments, fee records, and academic information.
- Implemented SQL joins, aggregate functions, normalization, constraints, and report generation.
- Created queries for fee tracking, department-level reports, attendance, and student information management.

Secure Cloud Access Control System

- Developed a secure cloud storage application that implemented user authentication and Role-Based Access Control (RBAC).
- Designed secure file access and user authorization using Python and MySQL.
- Improved secure data sharing through database-driven permission management.

Portfolio Website

- Built a responsive portfolio website using HTML, CSS, and JavaScript.
- Showcased technical skills, certifications, projects, and contact information with modern UI principles.

To-Do List Application

- Developed a JavaScript-based task management application using Local Storage.
- Implemented Create, Read, Update, and Delete (CRUD) functionality.
